1987-88 was designed to meet the targetted export of 24 lakh tonnes. However, actual exports were only 17.09 lakh tonnes due to refusal/non-lifting of substantial quantities by Romania, Japan and Yugoslavia. This led to MMTC having a stock of 16.50 lakh tonnes at loading stations and Paradip Port on 1-4-1988, which was sufficient to take care of export commitments during 1988-89.

(c) MMTC is offering attractive discount in sale prices for export from Paradip Port, and taking steps to diversify exports of iron ore in world market, particularly Middle East, China etc. As a long term measure, draft project report is being prepared for deepening of Paradeep Port and improving infrastructure for accommodating larger size vessels.
